The 7 Habits Of Highly Effective People ~Stephen R. Covey

Presented By Nehal Kaneria

Seven Habits Covey

PowerPoint Template

INTERDEPENDENCE

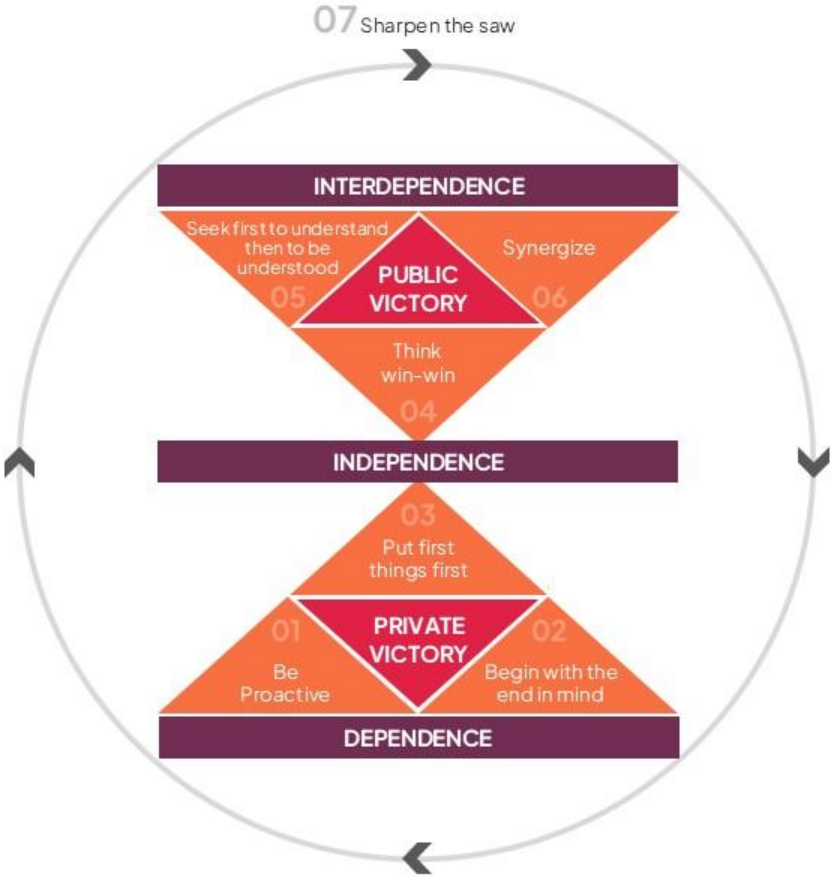
Building strong relationships fosters teamwork and collaboration. Effective communication and trust enhance mutual success. Working together creates greater results than working alone.

INDEPENDENCE

Taking responsibility for actions leads to personal growth. Setting clear goals helps achieve success. Prioritizing important tasks improves efficiency and productivity.

DEPENDENCE

Relying on others for guidance and support can be limiting. Waiting for external motivation hinders progress. Growth begins when individuals take control of their choices.



PRIVATE VICTORY

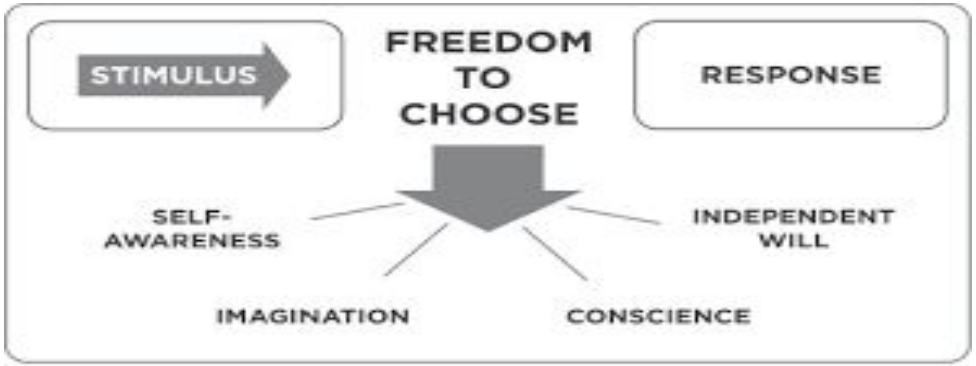
HABIT 1:

BE PROACTIVE

PRINCIPLES OF PERSONAL VISION

“PROACTIVITY”

A Proactive people is taking their own responsibility in their life, which is recognizing to have freedom of choice and expanding their circle of influence with their resources and initiative to grabbing opportunities with Self-Awareness, Imagination,Conscience and Independent Will.



PROACTIVE MODEL

CIRCLE OF CONCERN/CIRCLE OF INFLUENCE

DIRECT, INDIRECT, AND NO CONTROL

1. Direct Control: A Direct Control are solved by working on our habits and they are obviously within our Circle of Influence.
2. Indirect Control: A Indirect Control are solved by changing our methods of influence.
3. No Control: A No control problems involve taking the responsibility to change the line on the bottom on our face - to smile, to genuinely and peacefully accept these problems and learn to live with them, even though we don’t like them.

EXPANDING THE CIRCLE OF INFLUENCE

- The Proactive people are expanding the Circle Of Influence because they are learning from their own failure and mistake then they improve it also.
- They are learning from legends and influenced by them.
- A Proactive people they always 3 C’s in their life:Choices, Chances and Changes.
  - You must make the choice.
  - To take a chance.
  - If you want anything in life to change.

PRINCIPIES OF PERSONAL LEADERSHIP

HABIT 2:
BEGIN WITH END IN MIND

WHAT IT MEANS TO “BEGIN WITH THE END IN MIND”

1. To begin with the end in mind means to start with a clear understanding of your destination.
2. It means to know where you’re going so that you better understand where you are now and so that the steps you take are always in the right direction.

ALL THINGS ARE CREATED TWICE

1. Covey states that all things are created twice: first, a mental creation(the idea, plan, or blueprint), and second, a physical creation(the actual manifestation).
2. For example, a building is first designed(mental creation- blueprint) before it is physically constructed.

BY DESIGN OR DEFAULT

1. When you live a life with no direction-a”life by default”, as Covey explains-you will not move far in any one particular direction.
2. Likewise, if you consistently focus on the wrong things,your life will assuredly move in the wrong direction.
3. In short, while we may lead “busy” lives, we may not necessarily lead “effective” lives.

Visualization and Affirmation

1. A Big things have small beginnings.
2. To achieve your long-term goals
3. You need to create smaller short-term goals to guide your life in the right direction.

If dream it you can do it but you have a two type of Goals:

1. Long-term goals
2. Short-term goals

LONG TERM GOALS

1. Visualizing your long-term goals takes imagination.
2. It may be difficult to have a clear picture of where you want to be in 10,15 and 20 years, but the more you engage in visualization, the clearer the picture eventually becomes, and the more you set yourself up for success.

BLUEPRINT OF SHORT TERM

- So, you've come up with some long-term goals.Great! But that's not the end of it.
- You can't just say,"I hope to make more money" and expect it to happen on its own.
- Without a plan, your long-term goal is not a "goal" at all.
- It is just a dream.
- Achieving your long-term goals may seem like a daunting task.
- To accomplish these big goals, you need a, "blueprint for your life," in the form of smaller, more manageable short-term goals.
- Short-term goals give our lives clear direction and let us focus on the bigger picture.
- They also provide us with an easy way to evaluate ourselves.

BLUEPRINT OF SHORT TERM GOALS

- After all, if we are not accomplishing our short-term goals, we definitely will not achieve our long-term goals.
- Writing long-term goals is relatively straightforward.
- However, coming up with effective short-term goals can be a little more complicated.
- An easy way to come up with short-term goals can be a little more complicated.
- An easy way with a short-term goal program is to use the acronym **“SMART”** which stands for Specific, Measurable, Achievable, Relevant, and Time-bound.

BLUEPRINT OF SHORT TERM GOALS

1. **Specific:** Clearly define what you want to accomplish(use action words).
   Be specific about what you will do, by using action words.
2. **Measurable:** Define how you will track progress and know when it gets met.
   Provide a way to evaluate yourself.
3. **Achievable:** Ensure the goal is challenging but realistic and attainable.
   Make the short-term goal challenging, but something you can accomplish or attain in the short-term.
4. **Relevant:** The goal should align with your broader long-term objectives and values.Make the goal make sense, in the grand scheme of achieving your long-term goal.
5. **Time Bound:** Set a specific deadline or timeframe for achieving the goal.

BLUEPRINT OF SHORT TERM GOALS

Set a specific deadline for when you want to achieve your short-term goal.

Tips:

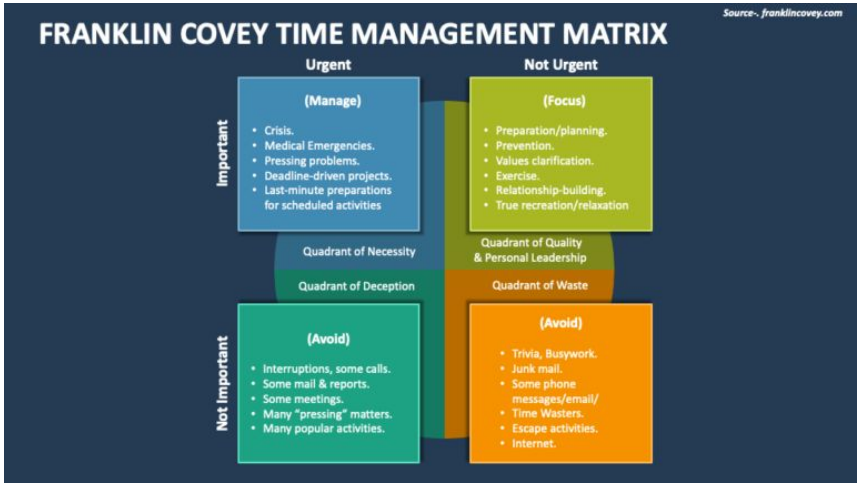
1. Sometimes, we have a tendency to have too many goals at one time.
2. Evaluate your goals.
3. Which one of these goals will move you in the direction of your long-term goals? These are “relevant” goals, which should be prioritized.

HABIT 3:
PUT FIRST THINGS FIRST

PRINCIPLES OF PERSONAL MANAGEMENT

TIME MANAGEMENT

1. A time management is a very crucial part in our life because it gives a values of punctuality, discipline and gives a priority in our work,family,skills with follows passions hobbies and routine also.
2. Make a daily schedule or routine with priority of time in your self management also.



QUADRANT II

There are four different parameter to manage the time.

1. Urgent And Important
2. Not Urgent But Important
3. Urgent But Not Important
4. Not Urgent Not Important

Focus upon Quadrant II because it’s explain Strategic Planning and Prepare for future endeavors

WHAT IT TAKES TO SAY “No”

If you were to fault yourself in one of three areas, which would it be:
(1) the inability to prioritize.
(2) the inability or desire to organize around those priorities.
(3) the lack of discipline to execute around them.
To stay with your priorities and organization?

FORMULA OF 8+8+8

1. 8 Hours of Honest,Hard Work
2. 8 Hours of Restful Sleep
3. 8 Hours of Personal Life(The 3F,3H,3S)

   a.3F -> Family,Friends and Faiths

   b.3H -> Health,Hygiene and Hobby

   c.3S -> Soul,Service and Smile

PUBLIC VICTORY

HABIT 4:

THINK WIN-WIN

PRINCIPLES OF INTERPERSONAL LEADERSHIP

Six Paradigms of Human Interaction

These six paradigms represent different mindsets we can adopt when working with others.

Understanding each helps us consciously choose Win-Win thinking.

Win/Win-

1. Mutual benefit in all interactions—everyone succeeds together and Win/Win is a belief in the Third Alternative.
2. It’s not your way or my way; it’s a better way, a higher way.

Six Paradigms of Human Interaction

Win/Lose :“If I win, you lose.”

1. In leadership style, Win/Lose is the authoritarian approach:
2. “I get my way; you don’t get yours.”
3. Win/Lose people are prone to use position, power, credentials, possessions, or personality to get their way.

Lose/Win:

1. Permissive approach—I give in to keep the peace.
2. They love their weaknesses—they take advantage of them.

Six Paradigms of Human Interaction

Lose/Lose:

1. Destructive mindset—if I can't win, neither can you Lose/Lose is also the philosophy of the highly dependent person without inner direction who is miserable and thinks everyone else should be, too.
2. “If nobody ever wins, perhaps being a loser isn’t so bad.”

Win:

1. Self-focused approach—I get mine, you get yours.
2. A person with the Win mentality thinks in terms of securing his own ends—and leaving it to others to secure theirs.

Six Paradigms of Human Interaction

Win/Win or No Deal:

1. Highest form—mutual benefit or we don't proceed No Deal means that if we can't find a solution benefiting both parties, we agree to disagree agreeably.
2. This approach provides tremendous emotional freedom, especially in family and business relationships.
3. Rather than compromising into a solution that leaves both parties unsatisfied, Win/Win or No Deal acknowledges that sometimes the best decision is not to make a deal at all.
4. This preserves relationships and allows for future opportunities when circumstances change.

Five Dimensions of Win/Win

Achieving Win/Win requires cultivating five essential dimensions.

These dimensions work together, creating a comprehensive framework for interpersonal leadership.

Character-

Foundation of integrity, maturity, and Abundance Mentality

Integrity-

1. Clearly identify your values and proactively organise around them daily.
2. Develop self-awareness and independent will by making and keeping meaningful promises.

Five Dimensions of Win/Win

Maturity-

1. The balance between courage and consideration.
2. Express your feelings and convictions with courage whilst considering others' thoughts and feelings.

Win/Win Performance Agreements-

1. Win/Win agreements shift the paradigm from vertical to horizontal—from supervision to self-supervision, from positioning to partnership. These agreements contain five essential elements that provide structure for productive interaction.

Five Dimensions of Win/Win

1. Accountability-Set up standards of performance and timing for evaluation
2. Consequences-Specify what happens—good and bad, natural and logical—as a result of evaluation
3. Desired Results-Identify what is to be done and when, focusing on outcomes rather than methods
4. Guidelines-Specify parameters—principles and policies within which results are to be accomplished
5. Resources-Identify human, financial, technical, or organisational support available to help accomplish results

HABIT 5: SEEK FIRST TO UNDERSTAND, THEN TO BE UNDERSTOOD

PRINCIPLES OF EMPATHIC COMMUNICATION

CHARACTER AND COMMUNICATION

1. Communication is the most important skill in life.
2. We spend most of our waking hours communicating.
3. Comparatively few people have had any training in listening at all.
4. And, for the most part, their training has been in the Personality Ethic of technique, truncated from the character base and the relationship base absolutely vital to authentic understanding of another person.
5. Your character is constantly radiating, communicating.
6. From it, in the long run, I come to instinctively trust or distrust you and your efforts with me.

Empathic Communication

1. Communication is the most important skill in life.
2. We spend most of our waking hours communicating, yet few people have had training in truly listening.
3. Your character constantly radiates and communicates—from it, people instinctively trust or distrust you.Empathic listening gets inside another person's frame of reference.
4. You see the world the way they see it, understand their paradigm, and comprehend how they feel.
5. This is not sympathy, which is agreement or judgement—empathy is about fully, deeply understanding someone emotionally and intellectually.

The Power of Empathic Listening

A. 10% Words What we actually say
B. 30% Sounds Tone and inflection
C. 60% Body Language

1. Non-verbal communication
2. Empathic listening is powerful because it gives you accurate data to work with.
3. Instead of projecting your own autobiography and assumptions, you're dealing with the reality inside another person's head and heart.

Four Autobiographical Responses

1. Evaluate — We agree or disagree
2. Probe — We ask questions from our frame of reference
3. Advice — We give counsel based on our experience
4. Interpret — We explain motives based on our own behavior

Empathic listening is a tremendous deposit in the Emotional Bank Account.

It gives people "psychological air" and creates deep therapeutic healing.

HABIT 6: SYNERGIZE

PRINCIPLES OF CREATIVE COOPERATION

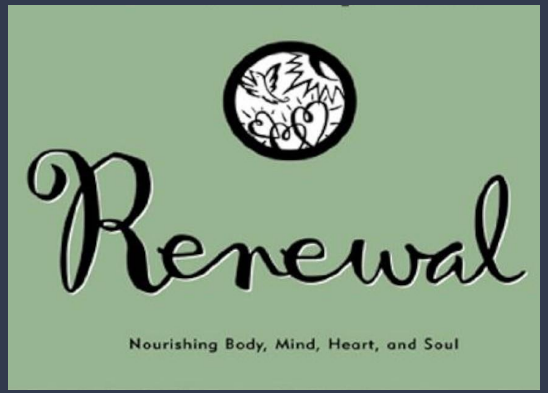
SYNERGY AND COMMUNICATION

- A Synergy is the power of creative collaboration which means that 1 + 1 may equal 8, 16, or even 1,600.
- The whole is greater than the sum of its parts.
- This principle tests whether we're truly open to creative possibilities emerging when people work together.
- Valuing differences is the essence of synergy—the mental, emotional, and psychological differences between people.
- Effective people have humility to recognise their perceptual limitations and appreciate rich resources available through interaction with others' hearts and minds.
- The more genuine the involvement in analysing and solving problems, the greater the release of everyone's creativity and commitment to what they create.
- Internal synergy is completely within your control—you can value differences even in adversarial environments, seeking Win/Win solutions and understanding diverse perspectives.

SYNERGY AND COMMUNICATION

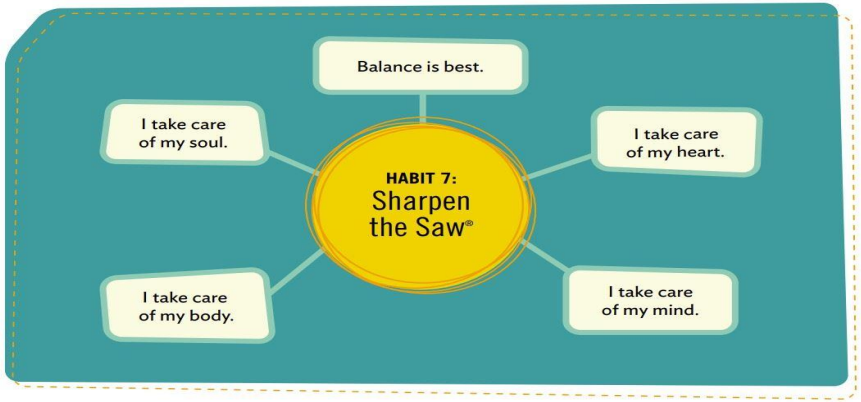
- Synergy represents the principle that the whole is greater than the sum of its parts.
- It's exciting, creative, and phenomenal what openness and communication can produce together.
- Creative Collaboration-New insights emerge from mutual learning.
- Higher Solutions-Third alternatives better than original proposals.
- Untapped Potential -Releasing unused capabilities and possibilities
- Valuing Differences-Recognising perceptual limitations and diverse perspectives

RENEWAL



HABIT 7:
SHARPEN THE SAW

PRINCIPLES OF BALANCED: SELF-RENEWAL



FOUR DIMENSIONS OF RENEWAL

1. This habit is about preserving and enhancing your greatest asset—yourself.
2. To maximize your personal growth, focus on Quadrant II tasks and adopt the 8+8+8 rule.
3. Remember that the most significant returns come from how you spend your final eight hours on the 3Fs, 3Hs, and 3Ss.
4. It means expressing all four dimensions of your nature regularly and consistently in wise and balanced ways.

FOUR DIMENSIONS OF RENEWAL

- THE PHYSICAL DIMENSION:

  You can master the Physical Dimension by dedicating 30 minutes daily to exercise,balanced nutrition, and stress management, ensuring your body develops the endurance and strength necessary for peak performance.

- THE MENTAL DIMENSION:

1. Reading, writing, and continuous learning. Expanding and sharpening your mind through education and reflection.
2. Read, write, learn continuously.
3. Building relationships and contributing to others. Develop empathy, synergy, and meaningful connections.

FOUR DIMENSIONS OF RENEWAL

- The Social/Emotional Dimension:

  To cultivated by building meaningful relationships through empathic communication, where one develops deep emotional connections by prioritizing service, synergy, and active contribution to the lives of others.

- The Spiritual Dimension:

1. The spiritual dimension is that to believe in God and faith in God is the greatest way to do sharpen the saw.
2. Everyone must follow the formula in your life: Prayer+Hard Work = Success

THE UPWARD SPIRAL

Learn, Commit, Do:

1. Moving along the upward spiral requires learning, committing, and doing on increasingly higher planes.
2. Growth isn't a one-time event—it's a continuous cycle.
3. As you develop these seven habits, you're not just becoming more effective. You're becoming more free, more secure, more wise, and more powerful.
